

Eagle Scout Project

Nathaniel Dunster, Eagle Scout candidate and a member of Troop 200 Yorktown has volunteered to work with his fellow scouts and build oyster cages for TOGA as a community service project. The work by the scouts is a generous donation of their time and effort. This will be a step for Nathaniel in becoming an Eagle Scout.

Nathaniel Dunster, Eagle Scout Candidate

Tidal Tumbler (a Rough Rider is the same cage without the float)

Mini Spat Tube, 17" long

The scouts will build "Eagle Scout Grow-out Kits." This kit consists of a mini spat tube and a Tidal Tumbler (or a Rough Rider: better for high-energy water).

The spat tube can hold up to 1000 spat initially. As with all spat containers, spat is moved to other cages as they grow. The Tidal Tumbler or Rough Rider holds up to 150 adult oysters.

The kits will be for sale at the Spring 2025 Float Sale, May 17 at Camp Kekoka. Quantities may be limited. TOGA is happy to be working with the Scouts of Troop 200.
